PROFESSIONAL SUMMARY

DevOps-oriented Software Engineer with a B.S. in Computer Science (Cybersecurity) and 3+ years of experience deploying and maintaining applications across cloud and on-premises environments. Hands-on experience with AWS infrastructure, Docker containerization, CI/CD pipelines, and deployment automation using Python and Bash scripting. Comfortable working with Windows and Linux systems, version control workflows, and basic networking concepts including TCP/IP and firewall configuration. Strong analytical and troubleshooting skills with a proactive approach to diagnosing and resolving technical issues, paired with clear communication suited to client-facing and cross-functional collaboration.

WORK EXPERIENCE

Full Stack Developer | Fineasy • Remote

Dec 2023 – Present

- Deployed and maintained backend services on AWS EC2 using Docker and Gunicorn, managing the full deployment process from build through production release with automated CI/CD pipelines via GitHub Actions.
- Wrote and maintained Python-based scripts to automate deployment tasks, configuration changes, and recurring infrastructure operations, reducing manual intervention and improving consistency across environments.
- Diagnosed and resolved production incidents independently, performing root cause analysis on backend and infrastructure issues to maintain system reliability and minimize downtime.

Web Developer / IT Support (Freelance) | Freelance • Remote

May 2022 – Dec 2023

- Managed deployment and hosting configuration for client web applications, coordinating directly with clients to troubleshoot issues and walk through technical changes in real time.
- Diagnosed and resolved infrastructure-level issues including hosting misconfigurations, plugin conflicts, and performance bottlenecks, applying root cause analysis to identify and repair underlying problems.
- Maintained clear, ongoing communication with clients throughout each engagement and documented configurations and troubleshooting steps to support consistent, repeatable deployments.

Software Engineer | IO21 FZ LLC • Remote

Jan 2022 – Apr 2022

- Worked within an Agile team environment supporting backend development and deployment testing, using Git for version control including branching and merging across feature development cycles.
- Validated API endpoints and deployment configurations using Postman, contributing to a stable and reliable release process within sprint timelines.
- Collaborated closely with backend developers and QA, communicating technical issues and proposed fixes clearly within a cross-functional remote team.

PROJECTS AND LEADERSHIP

AI-Powered Exam Monitoring Platform, Graduation Project Lead

- Led a team of 5 to design, deploy, and maintain a real-time monitoring system in Django, configuring network monitoring and event logging infrastructure and coordinating deployment and testing across the team.

Lab Assistant, University of Wollongong (Jun 2020 – Jun 2022)

- Provided hands-on technical support for students in OS and networking labs covering Windows and Linux environments, DHCP troubleshooting, and Cisco Packet Tracer imaging, developing strong foundational systems and networking knowledge.

CERTIFICATIONS

AWS Certified Developer – Associate

Oct 2023

Amazon Web Services

CompTIA Security+

Nov 2022

CompTIA

Certified Penetration Testing Specialist (CPTS)

Apr 2026

Hack The Box

Junior Penetration Tester

Aug 2024

TryHackMe

EDUCATION

Bachelor of Science in Computer Science (Cybersecurity)

Oct 2018 – Oct 2022

University of Wollongong • Dubai, UAE

TECHNICAL SKILLS

Deployment and Infrastructure: AWS EC2/CloudFormation, Azure (familiar), Docker, Gunicorn, Virtual Environments (VMware familiar)

CI/CD and Automation: GitHub Actions, CI/CD Pipelines, Deployment Scripting, Infrastructure as Code (familiar)

Scripting and Programming: Python, Bash, PowerShell (familiar), JavaScript, YAML/JSON

Version Control: Git, GitHub, Branching and Merging Workflows

Operating Systems: Windows 7/8/10/11, Windows Server 2012/2016/2019, Linux (Ubuntu, Kali), macOS

Networking: TCP/IP, DNS, DHCP, VPNs, Routing, Firewalls, Active Directory

Containerization: Docker, Container Deployment, Image Management

Security: CompTIA Security+, Network Security, Penetration Testing, Kali Linux

Tools: Postman, VirtualBox, Jira, Office 365

Frameworks and APIs: Django, Flask, Node.js, REST APIs
